

# DIANA JENKINS – INSURANCE BILLING

## DIANA’S STORY:

Diana was a stay-at-home mom with two children: a sixteen-year-old and an eight-year-old. With her children going to school full-time, Diana began looking for ways to expand her horizons. She heard about medical insurance billing and coding from some friends and thought it would be a profession she would enjoy.

## EAGLE GATE COLLEGE:

Diana enrolled in the Medical Insurance Billing and Coding program at Eagle Gate College in June 2009 and graduated in November 2010. The education she received and the environment at Eagle Gate College made it easier for Diana to complete the program that she thought. “The teachers that I had were excellent. We covered a lot of coding. Just working with everyone there was great.”

## NEW CAREER:

While enrolled at Eagle Gate College, Diana was placed for an internship at Hearing Life USA in Taylorsville, where she was subsequently hired full-time. She works as an insurance biller for the company and plans to take the certification exam in the near future.

*“I enjoy my career very much. I am working pretty independently. I know what I’m doing.”*
